SUBJECT INDEX

Actinide tetrafluorides, thermal decomposition, 241
Al-Mg double hydroxides synthesized by hydrothermal method, 119
Aluminum sulphate, basic, isomorphism, 323
Alunite, 323
Ammonium ions in the activation of nickel molybdate precursors, 163
Antimony(III) complexes with monochlorobenzoylhydrazones, 329
$BaCl_2$-KNO_3 system, kinetic study of solid-solid reactions, 209
Bi_2O_3 -V_2O_5 system and crystal data, 61
Bimetallic catalyst particles, 149
Biological studies, metal-isoorotic or thioisoorotic acids complexes, 341
Bis(N,N-diethyldithiocarbamato)tin(II), oxidation, 383
Bissalicylaldoximates of some heavy metals, thermal decomposition, 347
Borates, solid state thermal reactions, 197
Cadmium picoline halides, thermoanalytical investigation, 353
Calcium sulfite hemihydrate, thermal dehydration, 251
Carbon monoxide methanation, 137
Catalysis, 137, 143, 149, 155, 163, 169, 175
Ceria zirconia system, thermally induced changes, 113
Chlorobenzoylhydrazones of aldehydes, antimony(III) complexes, 329
Chromium coordination compounds, 365
Co oxides, prepared by the thermal decomposition of carbonates, 257
Coordination compounds, 329, 335, 341, 347, 353, 359, 365, 371, 377
Copper antimony oxides, 73
Copper(II) sulfates, basic, polarizing microscopy, 227
Copper(II) sulfates, basic, preparation and thermal decomposition, 221
Cr_3S_4 and Cr_2S_3 , kinetics of oxidation, 215
Crystal growth, 1
$CsCl/SmCl_3$ system, double chlorides, 275
Defect structure, 1
Desorption studies of MoS_2 -based hydrotreating catalysts, 143
Differential microcalorimetry study of bimetallic catalyst particles, 149
Electronic interaction between metal and support, 175
Emanation thermal analysis, 23
$EuBa_2Cu_3O_2$, T_c of, 55
$EuBa_2Cu_3O_{7-x}$, heat capacity, 49
$EuBa_2Cu_3O_{7-x}$, thermogravimetric index, 27
α-Fe_2O_3 , formation from Fe(III)-hydroxides, 101
γ-Fe_2O_3 , thermal evolution, 107
Ge-Sb-Se glasses, crystallization kinetics, 293
$GeSe_2$-GeTe-Sb_2Te_3 system, glass formation and crystallization, 287
Glasses, 287, 293
Hausmannite, thermal synthesis of, 93
$HoBa_2Cu_3O_{7-x}$, heat capacity, 49
$HoBa_2Cu_3O_{7-x}$, thermogravimetric index, 27
Ionic conduction of mixed metal hydroxides, 87
Irreversible processes in metallurgy, 311
Isoorotic and 2-thioisoorotic acids, metal complexes, 341
Kinetic study of solid-solid reactions, $BaCl_2$-KNO_3 system, 209
Kinetic study of superconducting oxide formation, 11
Kinetics of oxidation of Cr_3S_4 and Cr_2S_3, 215
Kinetics, crystallization, Ge-Sb-Se glasses, 293
KNO_3-$BaCl_2$ system, kinetic study of solid-solid reactions, 209
Kojik acid and maltol, mercury(II) complexes, 371
La-Ba-Cu-O systems in relation to high T_c superconductors, 17
Lanthanide and actinide tetrafluorides, thermal decomposition, 241
Li-B Alloys, lithium-rich, DSC analysis, 305
$LiNbO_3$, crystal growth, defect structure, thermal expansion, 1
Lithium insertion in $LiFe_5O_8$, 203
Magnesium hydroxide compacts, correlation of strength with heat, 131
Maltol, mercury(II) complexes, 371

Mercapto triazoles, neodymium(III) and samarium(III) derivatives, 359
Mercury(II) complexes of kojik acid and maltol, 371
Metal complexes of isoorotic and 2-thioisoorotic acids, 341
Metal-xanthosine complexes, 335
Metallurgy, 299, 305, 311, 319
Metals, heavy, bissalicylaldoximates, thermal decomposition, 347
Mg-Al double hydroxides synthesized by hydrothermal method, 119
$MgBr_2.6HOH$, thermal dehydration and hydrolysis, 263
Mn oxides, prepared by the thermal decomposition of carbonates, 257
Molybdate/tungstate system, solid state reactions, 191
Monochlorobenzoylhydrazones of fur-, pyrro- and thiophen-aldehydes, 329
MoO_3, reactivity of, 67
MoS_2-based hydrotreating catalysts, 143
Na_3AlF_6-NaCl, phase investigations of the system, 283
$NaCl/SmCl_3$ system, double chlorides, 275
Neodymium(III) and samarium(III) derivatives with mercapto triazoles, 359
Nickel molybdate precursors, 163
Nickel/alumina catalysts for carbon monoxide methanation, 137
NO, reduction with NH_3, DSC study, 169
Oxides, 61, 67, 73, 79, 87, 93, 101, 107, 113, 119, 125, 131
Pb-Sn system, 319
Pd/TiO_2 catalyst, adsorption of hydrogen, 175
Phase investigations of the system Na_3AlF_6-NaCl, 283
Phosphogypsum, thermal decomposition, 233
Picoline, cadmium halides, thermoanalytical investigation, 353
Polarizing microscopy for examining mechanisms of decomposition, 227
Powellite ($CaMO_4$), formation, 125
Pr-Ba-Cu-O systems in relation to high T_c superconductors, 17
Rare earth complexes of salicylaldehyde-β-alanine Schiff base, 377
$REBa_2Cu_3O_{7-x}$, a thermogravimetric index, 27
Salicylaldehyde-β-alanine Schiff base, rare earth complexes, 377
Samarium(III) derivatives with mercapto triazoles, 359
Scheelite ($CaWO_4$) and powellite ($CaMO_4$), formation, 125
Silica, solid state thermal reactions, 197
Sn-Pb system, 319
Solids, relation between structure and thermal reactions, 197
Specific heat anomaly and characterization, 39
Superconductors, 11, 17, 23, 27, 33, 39, 43, 49, 55.
Tetraethylammonium fluorooxo-vanadates(IV), thermal decomposition, 247
Thermal decomposition of salts, 221, 227, 233, 241, 247, 251, 257, 263
Thermal dehydration and hydrolysis, 251, 263
Thermal expansion, 1
Thermal transformation of yttrium hydroxides to yttrium oxides, 79
Thermogravimetric index, 27
Tin(II), bis(N,N-diethyldithiocarbamato), oxidation, 383
Titanium, measurements of layer thickness during oxidation, 299
Tungstate/molybdate system, solid state reactions, 191
Vanadates(IV), tetraethylammonium fluorooxo-, thermal decomposition, 247
Vanadates, crystal data, 61
Xanthosine complexes, 335
Y-Ba-Cu-O systems in relation to high T_c superconductors, 17
$YBa_2Cu_3O_2$, T_c of, 55
$YBa_2Cu_3O_{7-x}$, heat capacity, 49
$YBa_2Cu_3O_x$, 23
$YBa_2Cu_3O_x$, stability in different atmospheres, 33
Yttrium hydroxides, thermal transformation to yttrium oxides, 79
Zirconia system, thermally induced changes, 113
Zn-Cr catalysts, non-stoichiometry, 155
